"Bird Feeding and Cleanliness Program" Report

Department of BCA organized a "Bird Feeding and Cleanliness Program" at Mango Orchard of our Kisan Veer Mahavidyalaya Wai campus on 20th August 2024.

All the faculty members found that birds have difficulties in finding food and water in the mango orchard. So Department of BCA with the help of students organized and prepared artificial food bags for birds.

Accordingly students placed the bags on different trees. Further cleanliness drive was organised to clean the mango orchard and surrounding area. Students collected trash, removed weeds and place the bird feeders and water containers.

The program created awareness about importance of bird conservation and environmental cleanliness.

The participants were enthusiastic and actively involved in the programme. There were 20 male students, 47 female students, and 5 faculty members with a total of 72 participants.
