

KISAN VEER MAHAVIDYALAYA, WAI
DEPARTMENT OF GEOGRAPHY

PROGRAM OUTCOMES

BATCHLOR OF ARTS

By the end of the B. A. program the students will be able to:

PO1: Relating to Knowledge

- 1.1 Provide explanation of definitions, relevant terms and concept of geography.
- 1.2 Provide better explanation about relevant principles, theories and models in geography.
- 1.3 Provide idea about detail knowledge regarding man and environmental process.

PO2: Understanding and application

- 2.1 Know the importance of spatio-temporal scale.
- 2.2 Know the relation or complex nature between physical and human environments.
- 2.3 Identify the importance of places, environment and people.
- 2.4 Understand how processes bring changes in systems and its distribution.

PO3: Students Skills

- 3.1 Collection, representation and Interpretation of geographical data and sources.
- 3.2 Presentation of geographical evidence and ideas with identifying geographical trends and patterns.
- 3.3 Application of the cartographical techniques to support the inferences of geographical aspects.
- 3.4 Make obvious skill of analysis of geographical information.

PO4: Students Evaluation

- 4.1 Critically evaluate the basics of geography.
- 4.2 Assess the effects of geographical processes and its impact on physical and human environments.
- 4.3 Assess how the viewpoints of different groups of people, potential conflicts of interest and other factors interact in the management of physical and human aspects.
- 4.4 Evaluate the relative success of failure of initiatives.

KISAN VEER MAHAVIDYALAYA, WAI
DEPARTMENT OF GEOGRAPHY

Programme Specific Outcomes (PSO)

B. A. Part-I

- PSO1 The students are known the branches of Geography and latest concepts in Physical Geography Specifically in Atmosphere, Lithosphere, Fluvial Cycle and Hydrosphere.
- PSO2 The students are understood the Human races, Population growth, Characteristics of Population and Settlements.

Course Objectives and Course Outcomes (CO)

B. A. Part-I

Physical Geography (Paper -I)

Course Outcomes

1. Students will be able to understand the basic concepts in Physical Geography.
2. Students understand basic terms used to describe physical processes and landscape forms.
3. *Students understand the atmosphere.*
4. Students understand the concept of maps and globe.

Course Objectives

1. To study basic principles of the Physical Geography.
2. To understand the lithosphere, denudation, landforms, atmospheric elements and structure.
3. To understand the concept of maps and globe.

Human Geography (Paper -II)

Course Outcomes

1. Students will be able to understand the basic concepts in Human Geography.
2. Students understand basic terms used to describe population, settlements and agriculture.
3. Students understand the concept of Google Earth and Google Map.

Course Objectives

1. To study basic principles of the Human Geography.
2. To understand the concepts and terms regarding the population, settlements and agriculture.
3. To understand the concept of Google Earth and Google Map.

Course Objectives

B. A. Part-II

Soil Geography (Paper -III)

1. Students should know soil geography which is the fundamental branch of Physical Geography
2. To familiarize the students with the basics and fundamental concepts of soil geography
3. With this study, students understand soil is key resource for the development of any country
4. Students are aware about process of soil formation and development as well as soil properties.
5. Students should know classification, characteristics and distribution of soils.
6. Students should know the concepts related to soil degradation and erosion, causes and controlling factors of soil erosion, conservation of soils.
7. Students should know the concept, need and methods soil of management

Resource Geography (Paper -IV)

1. To understand the concept and classification of Resources
2. To examine the major resources (water, forest, energy and human) with their distribution, utilization and problems
3. To study the sustainable resource development
4. The course also aims to familiarize the students with cartographic techniques

Oceanography (Paper -V)

1. Students should know oceanography is the fundamental branch of Physical Geography
2. To familiarize the students with the basic and fundamental concepts of oceanography.
3. With this study, students understand marine is key resource for the development of any country.
4. Students should know physical and chemical properties of oceans.
5. Students should know types of oceanic currents and currents of Atlantic, Pacific and Indian oceans.
6. Students should know hypsographic curve, wind rose, iso-salinity lines and isotherms.

Agricultural Geography (Paper -VI)

1. To understand the concept and development of Agriculture.
2. To examine the role of agricultural determinants towards the changing cropping pattern.
3. To study the Green Revolution
4. The course also aims to familiarize the students with the Agricultural concepts and modern technologies used in Agriculture

Course Objectives and Course Outcomes (CO)

B. A. Part-III

Evolution of Geographical Thought (Paper -VII)

Course Outcomes

1. To study the historical evolution of geographic thought.
2. An analysis of different paradigms in geography.
3. To evaluating the contemporary trends in geographical studies.
4. To study the paradigms and debates in the geographical studies.
5. To study the recent trends in geography.

Course Objectives

1. Student should be able to understand in-depth about the Evolution of Geographical Thought.
2. Students should be able to analyse the recent trends in geography
3. Student should be able to make use of various models of paradigms and debates in the geographical studies.
4. Understanding of recent trends in geography.

Geography of India (Paper -VIII)

Course Outcomes

1. To acquaint the students with distinct dimensions of India and physical setup of the country.
2. To focus the climate of India and mechanism of monsoon of India.
3. To get information about soils and vegetations in India.
4. To help the students to understand recent trends in regional study.
5. To focus on the mineral, agricultural and industrial product of the country.
6. To understand the economic setup of the country.

Course Objectives

1. In depth understanding the dimensions and physiography of India.
2. The students are fully aware about the climatic seasons in India.
3. Detailed knowledge about soils, vegetations, drainage systems in India.
4. Understanding an importance of agriculture and industry in Indian economy.
5. Detailed knowledge about the economic setup of the India.

KISAN VEER MAHAVIDYALAYA, WAI
DEPARTMENT OF GEOGRAPHY

Population Geography (Paper -IX)

Course Outcomes

1. To study the basics of population geography.
2. To study the population growth trends and its distribution.
3. To study the population dynamics.
4. To study the population compositions and its characteristics.

Course Objectives

1. This paper would bring an understanding of population geography along with relevance of demographic data.
2. The students would get an understanding of distribution and trends of population growth in the developed and less developed countries, along with population concepts.
3. The students would get an understanding of the dynamics of population.
4. An understanding of the implications of population composition in different regions of the world.
5. An appreciation of the contemporary issues in the field of population studies

Economic Geography (Paper -X)

Course Outcomes

1. To study the locational factors of economic activities with special reference to agriculture and industry.
2. To study the basics concepts related to manufacturing and major manufacturing industries of selected countries of the world.
3. To study the transport and trade.

Course Objectives

1. In depth understanding about the economic geography
2. Detailed knowledge about locational factors of economic activities with special reference to agriculture and industry.
3. Detailed understanding of the basics concepts related to manufacturing and major manufacturing industries (selected countries) of the world.
4. Understanding of the transport and trade.

KISAN VEER MAHAVIDYALAYA, WAI
DEPARTMENT OF GEOGRAPHY

Urban Geography (Paper -XI)

Course Outcomes

1. To Study the basic of Urban Geography.
2. To Study the types of Urban Settlements, Site and Situations.
3. To get an idea of relationship between human activities and urban development.
4. To make the students capable for handling the present problematic situation in Urban and rural areas.
5. To make students as a good urban planner and environmental conservator

Course Objectives

1. The students were known the importance of urban settlements through urban geography.
2. The students understood the types of Urban Settlements, Site and Situations.
3. The students were familiar with an idea of relationship between human activities and urban development.
4. Detail understanding of students regarding present urban problems and students are capable to handling of present problematic situations in urban areas.
5. The students are developed as a good urban planner and environmental conservator.

Political Geography (Paper -XII)

Course Outcomes

1. To study the Political geography as a fundamental branch of Human Geography.
2. To familiarize the students with the basics and fundamental concepts and theories of Political Geography.
3. To aware the students about resource conflicts and politics of displacement.

Course Objectives

1. The students are fully aware about the Political geography as a fundamental branch of Human Geography.
2. The students are familiarized with the basics and fundamental concepts and theories of Political Geography.
3. The students are aware about resource conflicts and politics of displacement.

Fundamentals of Map Making and Map Interpretation (Paper -XIII)

Course Outcomes

1. To introduce the students with the importance of map making and map Interpretation.
2. To make the students to understand map, concept of scale and concept of projection.
3. To provide training in analysis of landforms.
4. To give basic information to the students about S.O.I. topomaps and I.M.D. weather maps.
5. To develop the skill of map Interpretation among the students.
6. To familiarize the students with the different cartographic techniques and methods used for representation of demographic and physio- socio-economic database.

Course Objectives

1. In depth understanding the map, concept of scale and projection.
2. Detailed knowledge about the analysis of landforms and its identification.
3. The students are deeply aware about basic information to the students about S.O.I. topomaps and I.M.D. weather maps and obtained the skills about map interpretation.
4. The students are deeply familiar with different cartographic techniques and methods used for representation of demographic and physio- socio-economic database

Advanced Tools, Techniques & Field Work in Geography (Paper -XIII)

Course Outcomes

1. To introduce the students with the importance of field work and advanced Techniques in Geography.
2. To provide training in application of modern tool and techniques in Geography.
3. To enable the students to understand the use of computer for analysis of Geographical data.
4. To enhance the skill of the students in instrumental survey.
5. To give basic information to the students about Arial Photographs, Remote Sensing, GIS and GPS

Course Objectives

1. In depth understanding the importance of field work and advanced Techniques in Geography.
2. The students are trained to implement modern tool and techniques in Geography.
3. Detailed knowledge about the use of computer for analysis of Geographical data.
4. The students are deeply aware about the basics and trained in instrumental survey.
5. The students are deeply familiar with computer, GIS, GPS and Remote Sensing.
