Report of Study Tour organized by Department of Botany

On 4th Feb, 2023 we B.S.C III students and Our teachers, Kisan Veer Mahavidyalaya, Wai visited the biodiversity park at Kurneshwar, Satara. Kurneshwar is popularly known among Satara peoples as Khinditla Ganapati. It is sacred place of Hindu deity Ganapati. Around the temple area many indigenous rare and medicinal plants are conserved. It's a community conservation project, established and maintained by Kurneshwar temple trust.

The park is best example of Ex-situ conservation. The spans an area of 5.5 acres. The park is filled with lush greenery, colorful flowers and flowering trees. The air was filled with the sweet scent of flowers and the sound of birds singing. It was truly peaceful and serene environment.

As we walked deeper into the park we came across various signboards with information on the different species of plants that could be found within the park. The park has a vast collection of rare and endangered plants that have been carefully cultivated and preserved. We also saw several animals including Monkeys, Squirrels and birds which were moving around the park freely. There were also man made ponds within the park, which were home to various species of fish and aquatic plants.

Throughout the park, there were designated walking trails that allowed visitors to explore the various sections of the park. The park also had a small museum that provided visitors with more information on the flora and founa of the region.

Also, we were fortunate that we could attend a lecture of eminent botanist Dr. Sachin Punekar. He did explain in brief about what to conserve? Why to conserve ? And where to conserve? Added to this, he personally had interaction with us and shared his research journey and opportunities in botanical research field.

In conclusion, our visit to the Biodiversity Park was an enriching experience. The park serves as an importance of preserving our natural resources and biodiversity. It was a joy to see so many different species co-existing in harmony and we left the park feeling inspired and grateful for the opportunity to witness such beauty.
