CARBON STRUCTURES

One of the earliest natural materials, graphite is used in pencils and is a good conductor of electricity.

Graphite is also used in machines or sliding systems and valves.

GRAPHITE

GRAPHITE STRUCTURE

A single human hair is made of more atoms than a 100m nanotube.

Carbon nanotubes are useful in electronics and optics.

Carbon nanotubes are extremely strong and conduct electricity well.

CARBON NANOTUBE

CARBON NANOTUBE STRUCTURE

The form of a buckyball closely resembles a soccerball.

Buckyballs are found after the smallest Buckminsterfullerene.

Buckyballs have potential uses in medicine and may help fight cancer.

DIAMOND

Formed at high pressures, diamond is one of the hardest known natural materials.

Diamonds are sometimes used in dentistry to drill into teeth.

Diamonds are also used in jewelry.
