## Curriculum improvement suggestions

15 responses

No

Starts some new short term courses

Work For Skill Development Courses

No any suggestion

Please focus on building the healthy environment around competitive examinations, because lot of my students are genuinely interested in preparing for these examinations which will give them an opportunity to go into the high level offices of the administration & even a tiny success rate in these elite examinations can create a good hype among parents & students, which will ultimately help in the other initiatives of the institution also. Thank you!

Need Based, Skill-Oriented Curriculum

1) Incorporate project-based learning opportunities where students can work on research projects or applications of physics concepts in real-world contexts.

## Would you like to contribute in any manner

15 responses

Yes

Give Fast Internet in all Campus for All Staff

Yes i like to contribute in any manner

I am aligned with Sanstha's vision to promote skill education & will contribute with any given responsibility.

I would like to contribute to students development by initiating research projects in material science. This project would aim to provide students with in-depth knowledge, practical skills, and research opportunities in the field. I believe that by developing a research-oriented learning environment, I can help students develop a strong foundation in this area and inspire them to pursue careers in renewable energy and scientific research.

Contributing by workin hard for betterment of Students

Yes, I will definitely teach content of specific course
