

Applied Zoology Paper VIII Question Bank

M.C.Q.

- 1) is an organism which provides shelter and nourishment to the parasite
a) Parasite b) Host c) Animal d) Virus
- 2) The term.... includes both host and parasite.
a) parasitism b) dermatology
- 3) c) ecology d) phylogeny
- 4) Relapsing fever should be treated by
a) cough Syrup b) combiflame
c) antigen d) antibiotic
- 5) Causative agent of Tuberculosis is... ..
a) Clostridium b) Salmonella Enterica
c) Staphaureusgi d) Mycobacterium
- 6) Breeding birds reared
a) in cages b) on litter
c) both in cages and on litters d) none of the above
- 7) Female Collosobruches chinensis bearstype of antennae
a) moniliforms b) pectinate
c) serrate d) setaceous
- 8) Basic two Symptoms of Typhoid fever are.....
a) gastrointestinal perforation b) constipation, Dizziness
c) weakness, Abdominal pain d) fever and Spot
- 9) Spirochete's are gram negative, Motile shaped bacteria
a) rod b) triangular
c) spiral d) oval

- 6) Symbiosis
- 7) Economics important of silk moth
- 8) Difference between definitive and intermediate host
- 9) Commensalism
- 10) Ectoparasite
- 11) Give an account of *papilio demoleus*
- 12) Silk worm diseases
- 13) Environmental management in poultry house
- 14) Treatment of TB
- 15) Describe life cycle of pulse beetle
- 16) litter management
- 17) Economic importance of silk moth
- 18) Commensalism

Long Answer Questions

1. Transmission and control measures of typhoid
2. Describe brief in various types of TB
3. Give an account on management of broilers
4. Describe various diagnostic test of tuberculosis
5. With neat labeled diagram, describe life cycle of *Bombyx mori*
6. Describe the life cycle and biological control of pulse beetle
7. Describe biological control of *Pyrilla purpusilla*
8. Define parasite and give an account of different types of hosts of the parasite with suitable example
